Need a second controller?
Daikin Airbase is a great option!

AIRHUB COMES IN TWO VERSIONS

1. ON/OFF ZONE CONTROL*

Allows users to air-condition occupied zones and switch off unoccupied zones. Features Airside Control.

2. LINEAR ZONE CONTROL**

Enables users to switch zones on and off as well as set the zone temperature to within $\pm 2^{\circ}\text{C}$. Features Opti-Zone Control.

* Airside Control is not available on R410A (FDYQN) Inverter Ducted series

** R32 (FDYA) Premium Inverter Ducted 71-160 Class and R32 (FDYAN) Inverter Ducted 50-160 Class

WHAT IS AIRSIDE CONTROL?

As zones are turned off, the indoor unit fan reduces speed between 60-100% of the nominal airflow rate to meet the airflow requirement of the remaining open zones for quieter operation and greater energy savings.

WHAT IS AIRSIDE CONTROL?

OptiZone Control will automatically regulate the individual zone dampers to deliver precise airflow to meet the temperature settings and heat load of each zone. As the zone dampers adjust, the indoor unit fan speed will intelligently regulate between 30- 100% of the nominal airflow rate to deliver the required airflow to maintain the comfort levels of each zone.

On days when the heat load is mild or low, significant energy savings can be achieved through OptiZone Control, truly optimising the system for ultimate comfort.
